ABOUT US

IPRS Consultants stands as a premier cybersecurity firm dedicated to fortifying digital defenses for organizations worldwide. Our commitment is unwavering, we deliver robust security solutions that empower businesses to achieve their goals securely. With a seasoned team of professionals, we bring extensive experience and expertise to the forefront, ensuring top-tier cybersecurity consultation, assessment, and testing services for every client.

Intrusion Prevention Systems

Monitors network traffic to detect and prevent malicious activities, ensuring robust network security.

Endpoint Detection & Response (EDR)

Provides continuous monitoring and response capabilities to detect and remediate threats on endpoints.

Data Loss Prevention (DLP) solutions

Protects sensitive data by monitoring and controlling data transfers to prevent unauthorized access and leaks.

OUR SERVICES

INTRUSION PREVENTION SYSTEMS (IPS)

IPRS Consultants offers robust Intrusion Prevention Systems (IPS) designed to protect your network from malicious attacks. Our IPS solutions continuously monitor network traffic, analyzing data packets for suspicious activities and threats. We provide real-time alerts and automated responses to neutralize potential risks before they escalate. With our expert guidance, clients benefit from enhanced security posture, reduced vulnerabilities, and compliance with industry standards, ensuring the integrity of their critical assets and data.

■ **Kaspersky**

Provides advanced firewalls and IPS features to detect and prevent malicious network traffic.

■ **Symantec**

Offers comprehensive IPS solutions to protect networks from known and emerging threats effectively.

■ **Forcepoint**

Integrates IPS capabilities to safeguard sensitive data while monitoring network activities for threats.

Intrusion Prevention Systems (IPS) Products

■ **McAfee Network Security Platform**

Delivers real-time intrusion prevention capabilities to protect networks against various cyber threats.

■ **Cisco Firepower**

Combines advanced threat protection and IPS functionalities to enhance network security and visibility.

ENDPOINT DETECTION AND RESPONSE (EDR)

IPRS Consultants provides comprehensive Endpoint Detection and Response (EDR) services to enhance endpoint security. Our EDR solutions offer continuous monitoring and real-time threat detection across all devices, allowing for rapid identification and remediation of potential security incidents. We utilize advanced analytics and machine learning to detect anomalous behavior and respond proactively to threats. With our expertise, organizations can safeguard their endpoints, minimize risks, and ensure compliance with industry regulations effectively.

■ **Kaspersky**

Provides endpoint protection with advanced EDR capabilities for threat detection and response.

■ **Symantec**

Offers comprehensive EDR solutions that protect endpoints through detection, investigation, and remediation.

■ **CrowdStrike Falcon**

Cloud-native EDR solution providing real-time threat intelligence and automated response capabilities.

Endpoint Detection and Response (EDR) Products

■ **Carbon Black**

Delivers endpoint protection with behavior-based detection and response for proactive threat management.

■ **SentinelOne**

Combines EDR and autonomous response capabilities to detect and remediate threats on endpoints.

DATA LOSS PREVENTION (DLP)

IPRS Consultants offers advanced Data Loss Prevention (DLP) services to safeguard sensitive information from unauthorized access and breaches. Our DLP solutions continuously monitor data flows across your network, identifying and controlling the movement of sensitive data. We implement policies to prevent data leaks through emails, cloud storage, and removable devices. With expert guidance, organizations can ensure regulatory compliance, protect their intellectual property, and maintain customer trust by effectively securing their critical data assets.

Data Loss Prevention (DLP) Products

■ Forcepoint

Integrates DLP capabilities to monitor and protect sensitive data across various network environments.

■ Symantec DLP

Offers comprehensive data protection by monitoring and controlling sensitive data movement across networks.

■ McAfee Total Protection for DLP

Provides visibility and control over sensitive data to prevent unauthorized access and breaches.

■ Digital Guardian

Delivers data-centric security with advanced DLP solutions for protecting sensitive information across endpoints.

■ Microsoft Information Protection

Ensures data security through classification, labeling, and DLP policies integrated within Microsoft 365.
